EXPERIENCE

Asirvad Microfinance Ltd

IT Co-ordinator

For maintaining and supporting the organization's IT systems, including troubleshooting hardware and software issues, providing technical assistance and training to users, managing network infrastructure, and ensuring data backup and security.

They coordinate IT projects, manage relationships with vendors, ensure compliance with IT policies, and continuously seek to improve the efficiency of IT operations while keeping detailed documentation and reporting on system performance.

PROJECTS

Project 1

<https://ajaykrishnankutty.github.io/Project3/>

Here my latest web designing project, crafted with precision and creativity using HTML, CSS, and Bootstrap. This responsive website showcases my expertise in transforming innovative ideas into captivating digital experiences. Leveraging Bootstrap's robust framework, I ensured seamless mobility and cross-browser compatibility.

Project 2

<https://github.com/Ajaykrishnankutty/Project4/archive/refs/heads/main.zip>

I am proud to present my comprehensive online shopping website, developed using a robust tech stack comprising HTML, CSS, Bootstrap, JavaScript, Python, and Django. This dynamic e-commerce platform seamlessly integrates captivating design elements with functional efficiency, ensuring an unparalleled user experience. Leveraging HTML and CSS, I crafted a visually appealing and responsive interface, while Bootstrap facilitated mobile-friendly and cross-browser compatibility. JavaScript enhanced interactive elements, and Python's Django framework provided a scalable and secure backbone for the application.

DECLARATION

I hereby declare that the above information is true to the best of my knowledge.
